

Cinch-Style Tree Ties 24", 32" and 36"

Part # GTT24, GTT32 & GTT36

Cinch-Style Tree Ties: Secure Your Trees the Smart Way

Give Your Young Trees the Strong, Gentle Support They Need

Newly planted trees face tough challenges — whipping winds, heavy storms, and unsteady roots. Our premium Cinch-Style Tree Ties provide reliable staking that holds firm without harming delicate bark or restricting natural growth.

Manufactured from durable, UV-resistant flexible vinyl, these innovative self-locking ties make installation a breeze: simply wrap around the trunk and stake, pull to cinch tight, and secure with the **included galvanized nail for zero slippage**. No knots, no tools, no fuss — done in seconds!

Key Benefits:

- Tree-Friendly Design — Soft, broad material prevents girdling and bark damage while allowing flexible movement for stronger root development.
- Double-Locking Security — Holds even in high winds, yet adjusts easily as your tree grows.
- Reusable & Long-Lasting — Built to withstand seasons of sun and weather; loosen, remove, and reuse on your next planting.
- Professional-Grade Strength — Perfect for single or double staking 5–50 gallon trees, transplants, and saplings.
- **Available in 24", 32", and 36" lengths to fit any job.**
