

Detectable Marking Tape

3" Purple – Recycled/Reclaimed Water Line Marking Tape

SPECIFICATION: For 3" x 1000', Purple Reclaimed Line Detectable Tape

Features:

- 3 inch x 1000 ft Roll/ 5 mil – Detectable
- Print: **CAUTION: RECYCLED/RECLAIMED WATER LINE BURIED BELOW**
- APWA color coded and permanently printed
- Detectable using standard electromagnetic metal locators
- UV-stable printing for long-term soil exposure
- Chemical-resistant polyethylene suitable for burial
- Service temperature: -40°F to 175°F

Installation:

- Install 12–18 inches above the buried utility/irrigation line
- Lay flat in trench with printed side facing upward
- Backfill per project requirements

Specifications:

Detectable aluminum marking tape designed to identify and locate buried irrigation or water lines. Constructed with a polyethylene film laminated to an aluminum foil core to allow detection by standard a-ferrous metal detector equipment.

Property	Specification
Width	3 in (76 mm)
Roll Length	1000 ft (305 m)
Color	Blue
Total Thickness	5–7 mil (varies by manufacturer)
Material	Polyethylene film + magnetized stainless steel or ferrite layer
Detectable Layer	Magnetic stainless steel or ferrite composite
Magnetic Field Strength	Meets detectable tape industry standards (varies by brand)
Print	UV-resistant repeating warning message

Part #	Description	Roll Size	Case Size
